

AMENDMENTS TO THE CLAIMS

- Sub C1 7
1. (Original) A method of interfacing to a user, the method comprising:  
using a data connection to receive a plurality of descriptions of audio contents;  
receiving from the user a selection of a first description from among the plurality of  
descriptions; and  
placing a voice call to play a first audio content described by the first description in  
response to the selection.
2. (Withdrawn)
3. (Withdrawn)
4. (Withdrawn)
5. (Withdrawn)
6. (Withdrawn)
7. (Original) The method of Claim 1 wherein:  
each of the data connection and the voice call are respectively formed with a  
first logic and a second logic; and  
the method includes the first logic providing information about the user to the  
second logic.
8. (Original) The method of Claim 7 wherein:  
the information being provided includes an identifier of an audio content  
currently described to the user.
9. (Original) The method of Claim 8 further comprising:  
receiving a plurality of calls from a corresponding plurality of users; and  
matching the audio content to be played with a call, based on an identifier obtained from a  
wireless handset of the user.
10. (Original) The method of Claim 7 further comprising:  
retrieving each of the audio contents from the Internet.

28. (Original) A method of interfacing to a user, the method comprising:  
using a data connection to receive a description of an audio content;  
receiving from the user a command to play the audio content; and  
placing a voice call to play the audio content in response to the command.
29. (Original) The method of Claim 28 further comprising:  
each of the data connection and the voice call are respectively formed with a  
first logic and a second logic; and  
the method includes the first logic providing information about the user to the  
second logic.
30. (Original) The method of Claim 29 wherein:  
the information being provided includes an identifier of an audio content  
currently described to the user.

43. (Original) A method of interfacing to a user, the method comprising:  
using a data connection to receive a number of descriptions of audio content;  
displaying the descriptions to the user;  
receiving from the user a command to play one of the audio contents described  
by the descriptions;  
placing a voice call in response to the command;  
playing said audio content to the user during the voice call; and  
returning to using the data connection in response to completion of the voice  
call.
44. (Original) The method of Claim 43 further comprising:  
using an available telephone number to generate an instruction for said placing  
of voice call.
45. (Original) The method of Claim 44 further comprising:  
forming an association between said telephone number and said audio content;  
and  
using said association on receipt of said voice call at said telephone number in  
identifying said audio content for said playing.

46. (Original) The method of Claim 44 further comprising:  
identifying the user on receipt of said voice call; and  
using identity of the user on receipt of said voice call to identify said audio  
content for said playing.

47. (Original) The method of Claim 43 further comprising:  
displaying to the user a plurality of categories of audio contents; and  
receiving from the user a selection of a category prior to said using of data  
connection.
